## Businesses look sharper with FOXTEL HD

There's nothing quite like the experience of FOXTEL HD and 5.1 surround sound in your business. Imagine staff and customers being immersed in the action of live sport, the beat of hit music videos or dedicated documentaries and entertainment channels. The atmosphere in your business will rise to a whole new level. And with sharper images, brighter colours and real-work detail, FOXTEL HD creates a whole world of quality TV where your business never looked sharper.

Who wouldn't love high definition TV? By using up to five times more pixels than standard television, high definition TV delivers outrageously better picture quality. Images are richer, with more vibrant colours and better-defined edges and lines.

Many high definition TV programs are also made with cinema-style surround sound — just add the right surround sound system and you've got a viewing experience that'll give your business that point of difference.
